

DISPOSABLE DUST MASK

Disposable FFP2V Dust Mask with Valve | SP-RP-001

Description

The SPROM Disposable FFP2V Dust Mask with Valve provides reliable protection against dust, fine particles, and non oil based aerosols. Its built-in exhalation valve improves breathability, reduces heat and moisture, and ensures comfort during extended wear. Lightweight, disposable, and easy to fit, it is ideal for industrial, construction, and general work environments where respiratory safety is required

Key Information

Colors: ○

Fabric: Multi-layer non woven fabric for high filtration performance

Size range: Standard

Key Features

- ▶ **Protection Level:** FFP2V rated (filtering facepiece)
- ▶ **Filtration Efficiency:** $\geq 94\%$ filtering of airborne particles
- ▶ **Design:** Disposable dust mask with exhalation valve for easier breathing and reduced moisture
- ▶ **Fit:** Elastic ear loops and flexible nose clip for secure, comfortable fit
- ▶ **Valve:** One way valve to reduce heat and humidity inside the mask
- ▶ **Standards:** Complies with relevant FFP2 respiratory protection standards, EN 149:2001

Warning

FFP2V dust masks are ideal for medium-level dust environments such as plastering and sanding; they do not protect against fumes, gases, or vapours and do not supply oxygen, must be used in well-ventilated areas, discarded after one shift (8 hours), and users should leave the area if breathing becomes difficult or dizziness occurs.

EN 149
