

DISPOSABLE DUST MASK

Disposable Flat Fold FFP3V Dust Mask with Valve
SP-RP-003

Description

The SPROM Disposable Flat Fold FFP3V Dust Mask with Valve provides advanced respiratory protection against fine dust, solid and liquid aerosols. The built-in exhalation valve reduces heat and moisture build-up, improving comfort during extended wear. Lightweight, disposable, and easy to fit, it is ideal for high-dust industrial, construction, and woodworking environments.

Key Information

Colors: 

Fabric: Multi-layer non-woven fabric with soft foam nosepiece for improved fit

Size range: Standard

Key Features

- ▶ **Protection Level:** FFP3V (valved, NR D) – highest class of particulate filtration
- ▶ **Filtering Efficiency:** $\geq 99\%$ against airborne particles
- ▶ **Design:** Flat fold disposable mask with exhalation valve for reduced breathing resistance
- ▶ **Fit:** Adjustable head straps and flexible nose clip for secure, comfortable wear
- ▶ **Dolomite Tested:** Ensures clogging resistance in high dust environments
- ▶ **Standards:** Complies with EN149:2001 + A1:2009 (FFP3 NR D)

Warning

FFP3 flat fold masks are suitable for high dust environments and protect against solid and liquid aerosols; they do not protect against gases or vapours, do not supply oxygen, must be used in well-ventilated areas, are single-use (8 hours), and users should leave the area if breathing becomes difficult or dizziness occurs, with guidance from a Safety Officer recommended.

EN 149
