

FALL PROTECTION

Retractable Fall Arrester 15m | SP-FP-006

Description

The SPROM Retractable Fall Arrester 15 m is designed for safe vertical mobility while working at heights. It features a 15m galvanized steel wire rope with a robust polymer housing, swivel anchorage eye, and a swivel steel snap hook with load indicator. The integrated energy-absorbing mechanism ensures fall arrest within inches, minimizing free fall hazards and impact forces.

Key Information

Colors: ●

Size : 15 meters.

Fabric: Retractable Fall Arrester with galvanized steel cable, high strength polymer housing, automatic steel brake, and steel/aluminium connectors

Key Features

- ▶ **Compliance** : EN 360 :2002 | EU PPE Regulation 2016/425
- ▶ **Retractable** fall arrester with 15m galvanized steel cable (Ø4.5mm, 15kN strength)
- ▶ **Arrests** falls within inches, providing extra protection at low heights
- ▶ **Swivel** anchorage eye with karabiner at anchorage end
- ▶ **Tag line** for easy retraction when not in use
- ▶ **Swivel** snap hook with load indicator at harness connection end
- ▶ **intrinsically** safe for use in explosive environments.

Applications

The SPROM Retractable Fall Arrester 15m is suitable for construction and scaffolding, mining and refineries, shipbuilding, warehousing and utilities, as well as rope access, maintenance, and industrial cleaning, providing reliable fall protection in a wide range of elevated work environments
