

# FALL PROTECTION

Retractable Fall Arrester 3m with Hook | SP-FP-005

## Description

The SPROM Retractable Fall Arrester is engineered for fall protection and safe vertical movement when working at heights. It features a 3 m galvanized steel wire rope, a rugged high strength polymer housing, a swivel anchorage eye, and a swivel steel snap hook with load indicator. The built in energy absorbing brake mechanism activates instantly in the event of a fall, minimizing free fall distance and reducing impact forces on the user.

## Key Information

**Colors:** ●

**Size :** 3 meters.

**Fabric:** Retractable Fall Arrester with galvanized steel cable, high strength polymer housing, automatic steel brake, and steel swivel connectors

## Key Features

- ▶ **Compliance:** Designed to comply with EN360:2002 personal fall protection standards.
- ▶ **Retractable fall arrester:** 3m galvanized steel wire rope with a minimum static strength  $\geq 15\text{kN}$ .
- ▶ **Fall arrest action:** Automatic energy absorbing braking system that limits impact forces to safe levels ( $< 6\text{kN}$ ).
- ▶ **Arrest distance:** Arrests falls within minimal distance to reduce free fall hazard.
- ▶ **Anchorage end:** Swivel anchorage eye with steel screw locking karabiner for secure installation
- ▶ **Attachment end:** Swivel snap hook with load indicator at harness connection point.
- ▶ **Housing:** High strength polymer/ABS casing for durability and impact resistance.

## Applications

Suitable for construction and scaffolding, mining and refineries, shipbuilding, warehousing and utilities, as well as rope access, maintenance, and industrial cleaning, providing reliable fall protection in a wide range of elevated work environments
