

GAS FILTER CARTRIDGES

SPROM A1 Gas Filter Cartridges | SP-RP-005

Description

SPROM A1 Gas Filter Cartridges are designed to protect against organic gases and vapours (e.g., solvents, paints, fuels) in industrial environments. When fitted to the SPROM Full Face Mask Respirator, they provide reliable filtering performance for tasks involving exposure to organic contaminants.

Key Information

- Colors:** ●
Fabric: High quality activated carbon layer combined with particle filter media
Size range: Standard

Key Features

- ▶ **Type:** A1 (Organic gas & vapour filter)
- ▶ **Norms:** EN 14387:2004 + A1:2008 certified
- ▶ **Protection:** Filters organic gases and vapours with boiling point >65°C

Warning

Do not use this cartridge in environments where oxygen levels are below 19.5%, where contaminants are unknown or present an immediate risk to life or health, or where concentrations exceed regulated safety limits. It must also not be used in firefighting situations or in explosive or potentially explosive atmospheres. These cartridges do not supply oxygen and are not suitable for oxygen-deficient or poorly ventilated areas.

Replace the gas filter immediately if chemical breakthrough is detected, such as through smell, taste, or any other warning signs, in accordance with the user manual. This cartridge is intended exclusively for use with twin-filter mask systems.
