

SAFETY BOOTS

SPROM Rigger Safety Boots | SP-SB-005

Description

The SPROM Rigger Safety Boots are designed for rugged environments where both durability and comfort are required. Constructed with full-grain leather uppers, a 200J composite non-metallic toe cap, and a Kevlar anti-penetration midsole, these boots provide full S3-rated protection without the use of metal. With a heat-resistant outsole (300°C) and a TPU toe bumper, they ensure protection against scuffing, penetration, water ingress, and high temperatures.

Key Information

Colors: ● ●
Fabric: Leather
Size range: 4-13

Key Features

- ▶ **Toe Cap:** 200J composite non-metallic toe cap
- ▶ **Midsole:** Kevlar anti-penetration midsole (S3 rated)
- ▶ **Upper:** Full-grain leather with TPU toe bumper for scuff resistance
- ▶ **Water Resistant:** Treated upper to repel liquids
- ▶ **Outsole:** Heat resistant rubber (up to 300°C)
- ▶ **Construction:** Injection moulded PU/rubber sole unit
- ▶ **Lining:** Black taibrelle mesh
- ▶ **Footbed (Insole):** Moulded PU with taibrelle mesh upper, contoured heel & arch support
- ▶ **Insole Board:** 3MR Ibitech non-woven insole board
- ▶ Non-metallic design for use in metal-free environments
- ▶ **Compliance:** EN ISO 20345:2011 S3 SRC (anti-static, energy absorption, slip resistance, water resistant, heat resistant)

Applications

Mining & heavy industry, Chemical & petrochemical plants, Refineries & smelters, Welding & foundries, Fishing & allied industries, General construction & rugged outdoor work
