

HELMET

SPROM safety helmet | SP-HF-002

Description

The SPROM Safety Helmet is designed for industrial, mining, and construction environments where reliable head protection is critical. Built with a high-impact HDPE shell, it offers flame and penetration resistance while maintaining a lightweight, comfortable fit. The helmet features a ratchet adjustment system for easy sizing, multiple chin strap options, and integrated ventilation slots to ensure comfort during extended use.

Key Information

Colors: Multiple high visibility colors available for work-place safety

Size range: Standard

Fabric: High density, impact resistant HDPE or ABS (depending on model)

Key Features

- ▶ **Standard Compliance:** CEEN397:2012 Industrial Safety Helmet certification
- ▶ **Impact Resistance:** Protects against falling objects and shock absorption as per EN397 requirements
- ▶ **Suspension:** Adjustable 4 or 6 point suspension for improved fit and comfort
- ▶ **Chin Strap:** Optional adjustable chin strap for secure fit (where applicable)
- ▶ **Ventilation:** Models with ventilation slots available for better airflow and comfort
- ▶ **Compatibility:** Designed to work with ear protection, face shields, and safety glasses

Applications

Industrial and construction environments where protection against head impacts, falling objects, and general jobsite hazards is required.
